Welcome System Schematic

Church check-in flow from kiosk search to attendance reporting

Service OPEN

Service CLOSE

Kiosk Zone (3-4 devices)

1) Greeter Kiosk

Search by last name or last 4 phone digits

Family members grouped and pre-selected

Supports "I'm new here" modal

2) Check-In Action

Select members to check in

Print one nametag per person

If fully checked-in: allow reprint only

Application Layer (Django)

3) Service Gate + Business Rules

Service status: Open / Closed

Closed service blocks kiosk check-in

One attendance record per person per service

4) Data Persistence

Store families, people, services, attendance

SQLite database (cats.sqlite3)

Reliable attendance history for staff

Search request

Write attendance

Check-in payload

Batch label printing

Print Nametags

Primary Flow

Kiosk Search -> Select Family Members -> Print/Check-In ->

-> Staff Dashboard + Missing Members Report
